

For the welfare of African women and children worldwide

Set up in 1985 by a small group of African women wanting to socialise and help each other with day to day responsibilities such as child care and community support the group in no time grew into an organisation working and focusing on providing, supporting and advocating for varied forms of services needed by the expanding African communities. The organisation continues to thrive to this day as guided by the following framework.

Vision: Improved quality of life of African women and children worldwide

Mission: To help alleviate poverty, build meaningful and sustainable development among African women and children through capacity and capability building as well as change education in which all women and children can make informed choices about various issues and concerns in their communities.

All this is based on the premise that women and children are actively engaged in their communities at all levels of decision making as empowerment tools and change agents as well the people who relay matters in any interventions involving them as beneficiaries.

Focus Areas include

- ♣ Domestic Violence
- ♣ Poverty
- ♣ Human rights
- ♣ Education
