

SMC is preventive medicine that protects children under five from malaria during the rainy season

Since 2015 Malaria Consortium has helped prevent

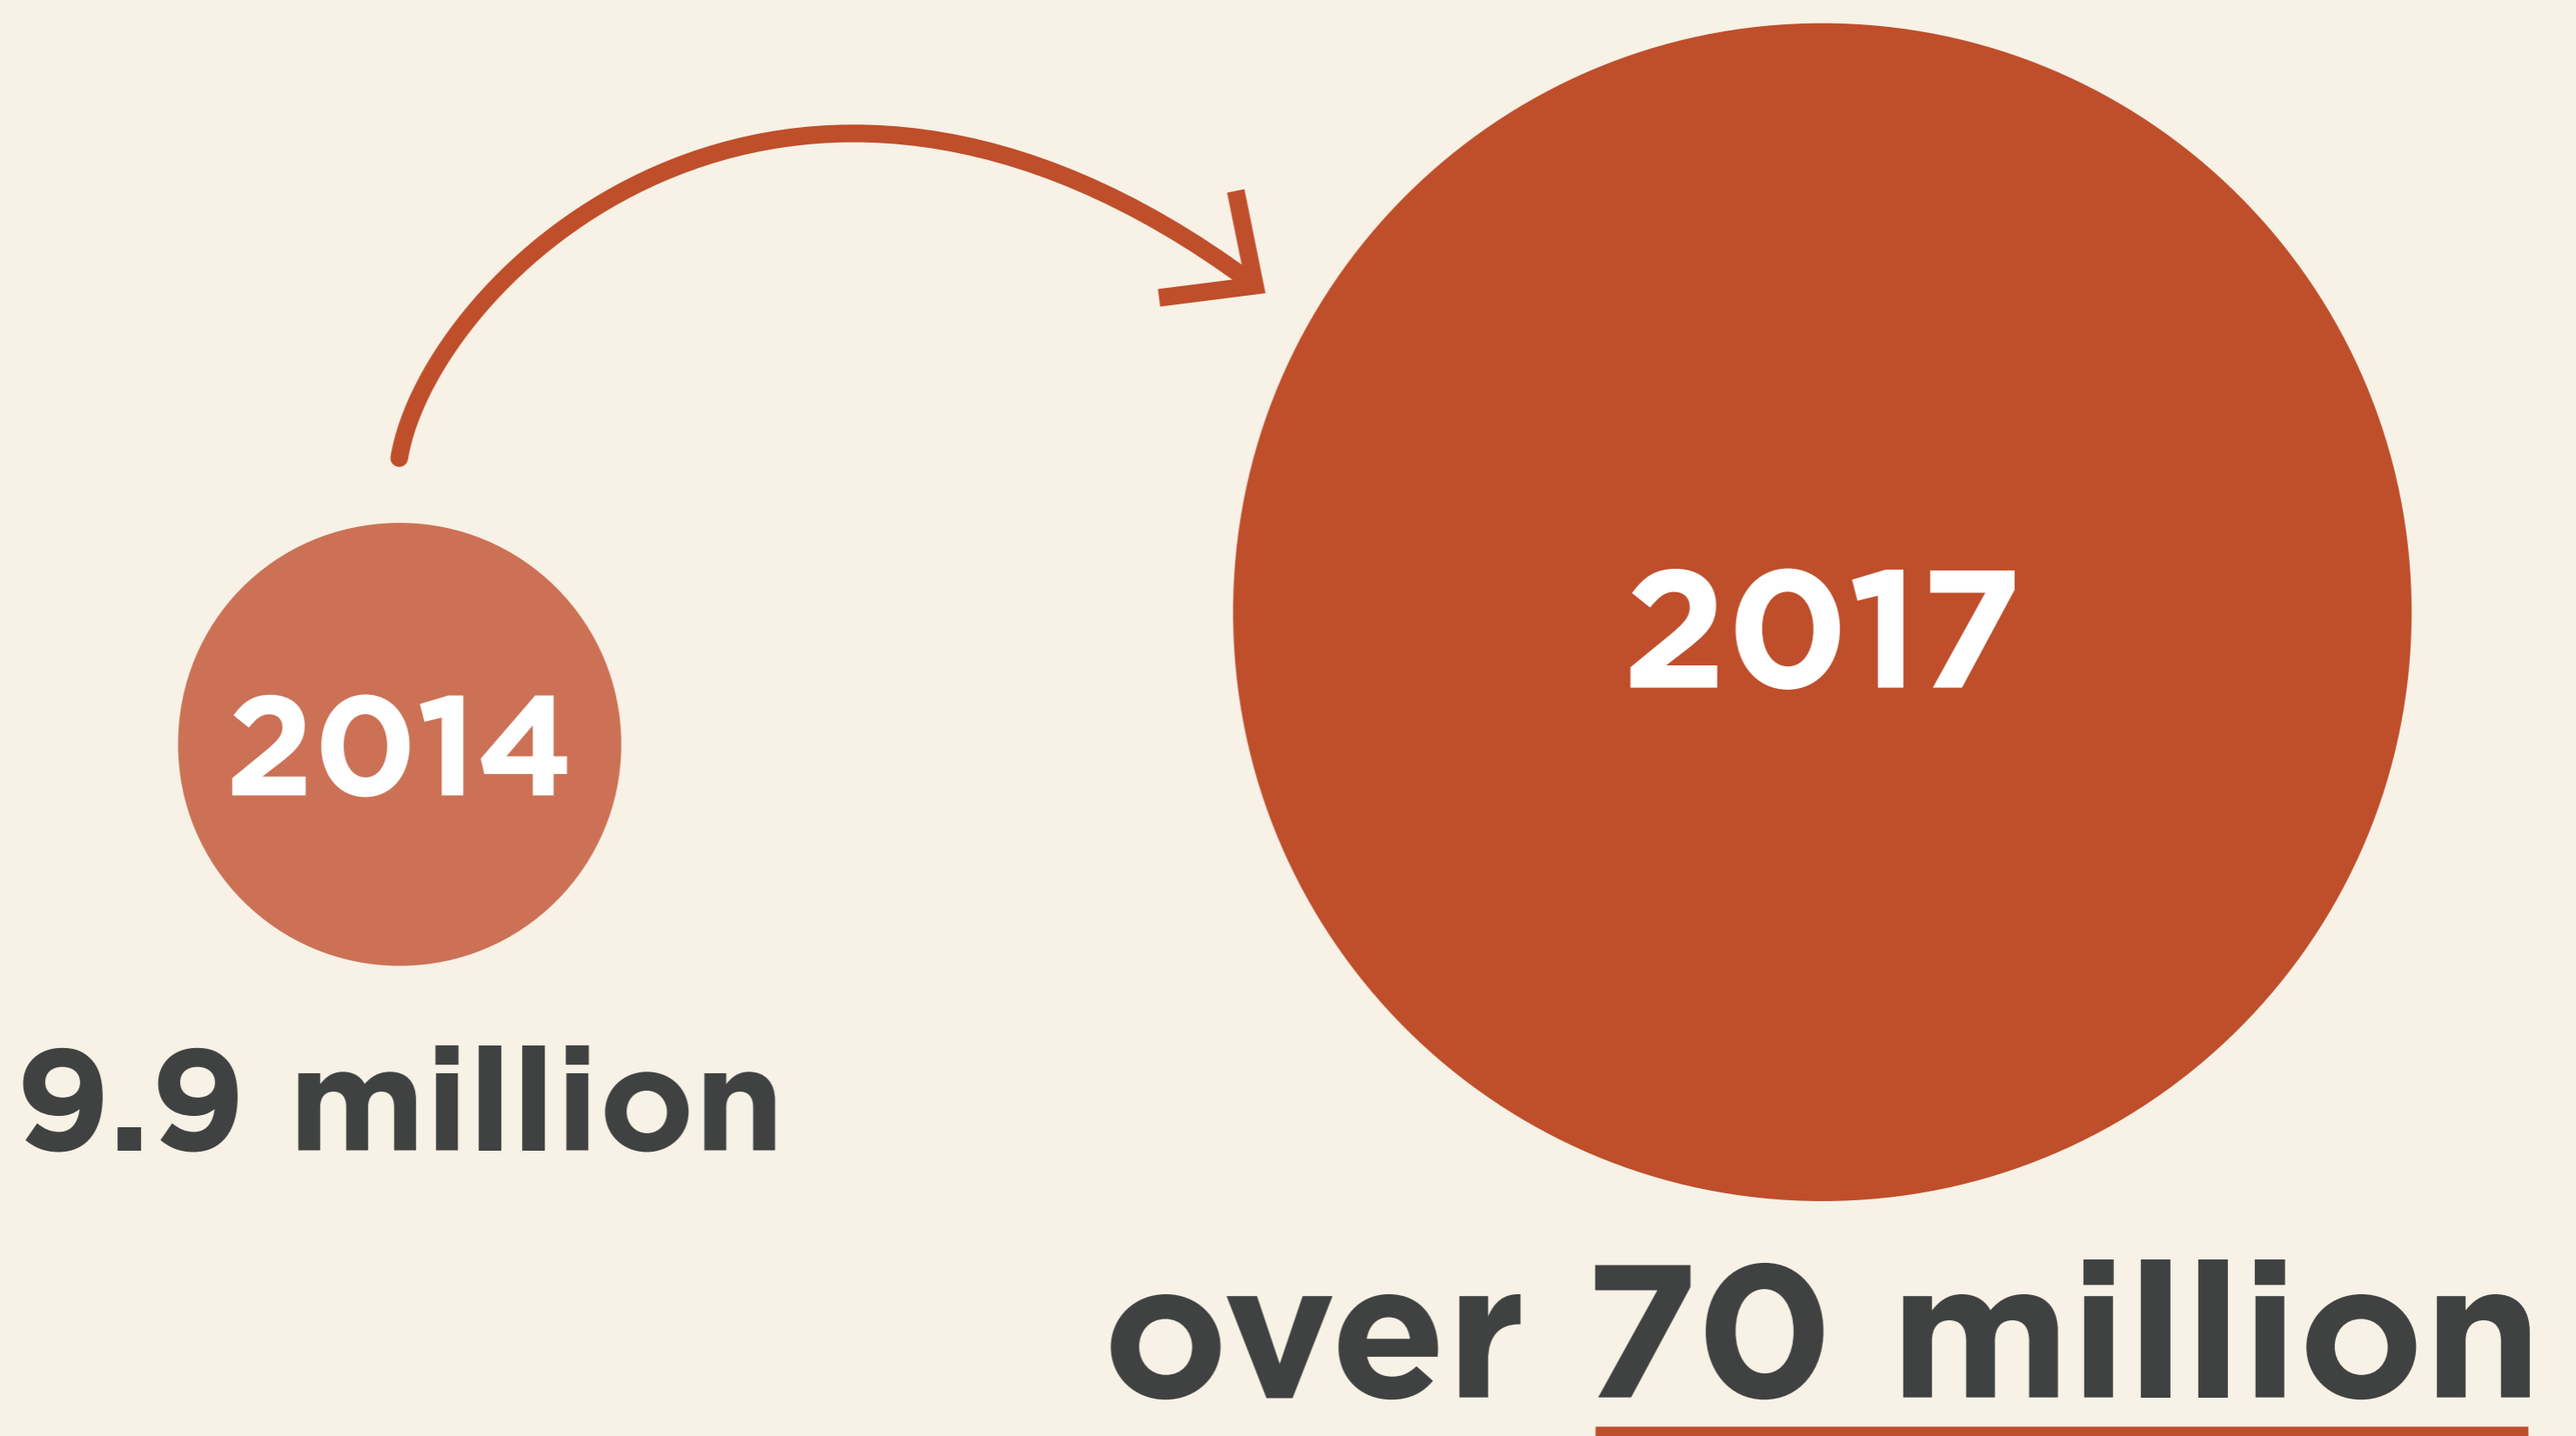

10 million
cases of malaria

and

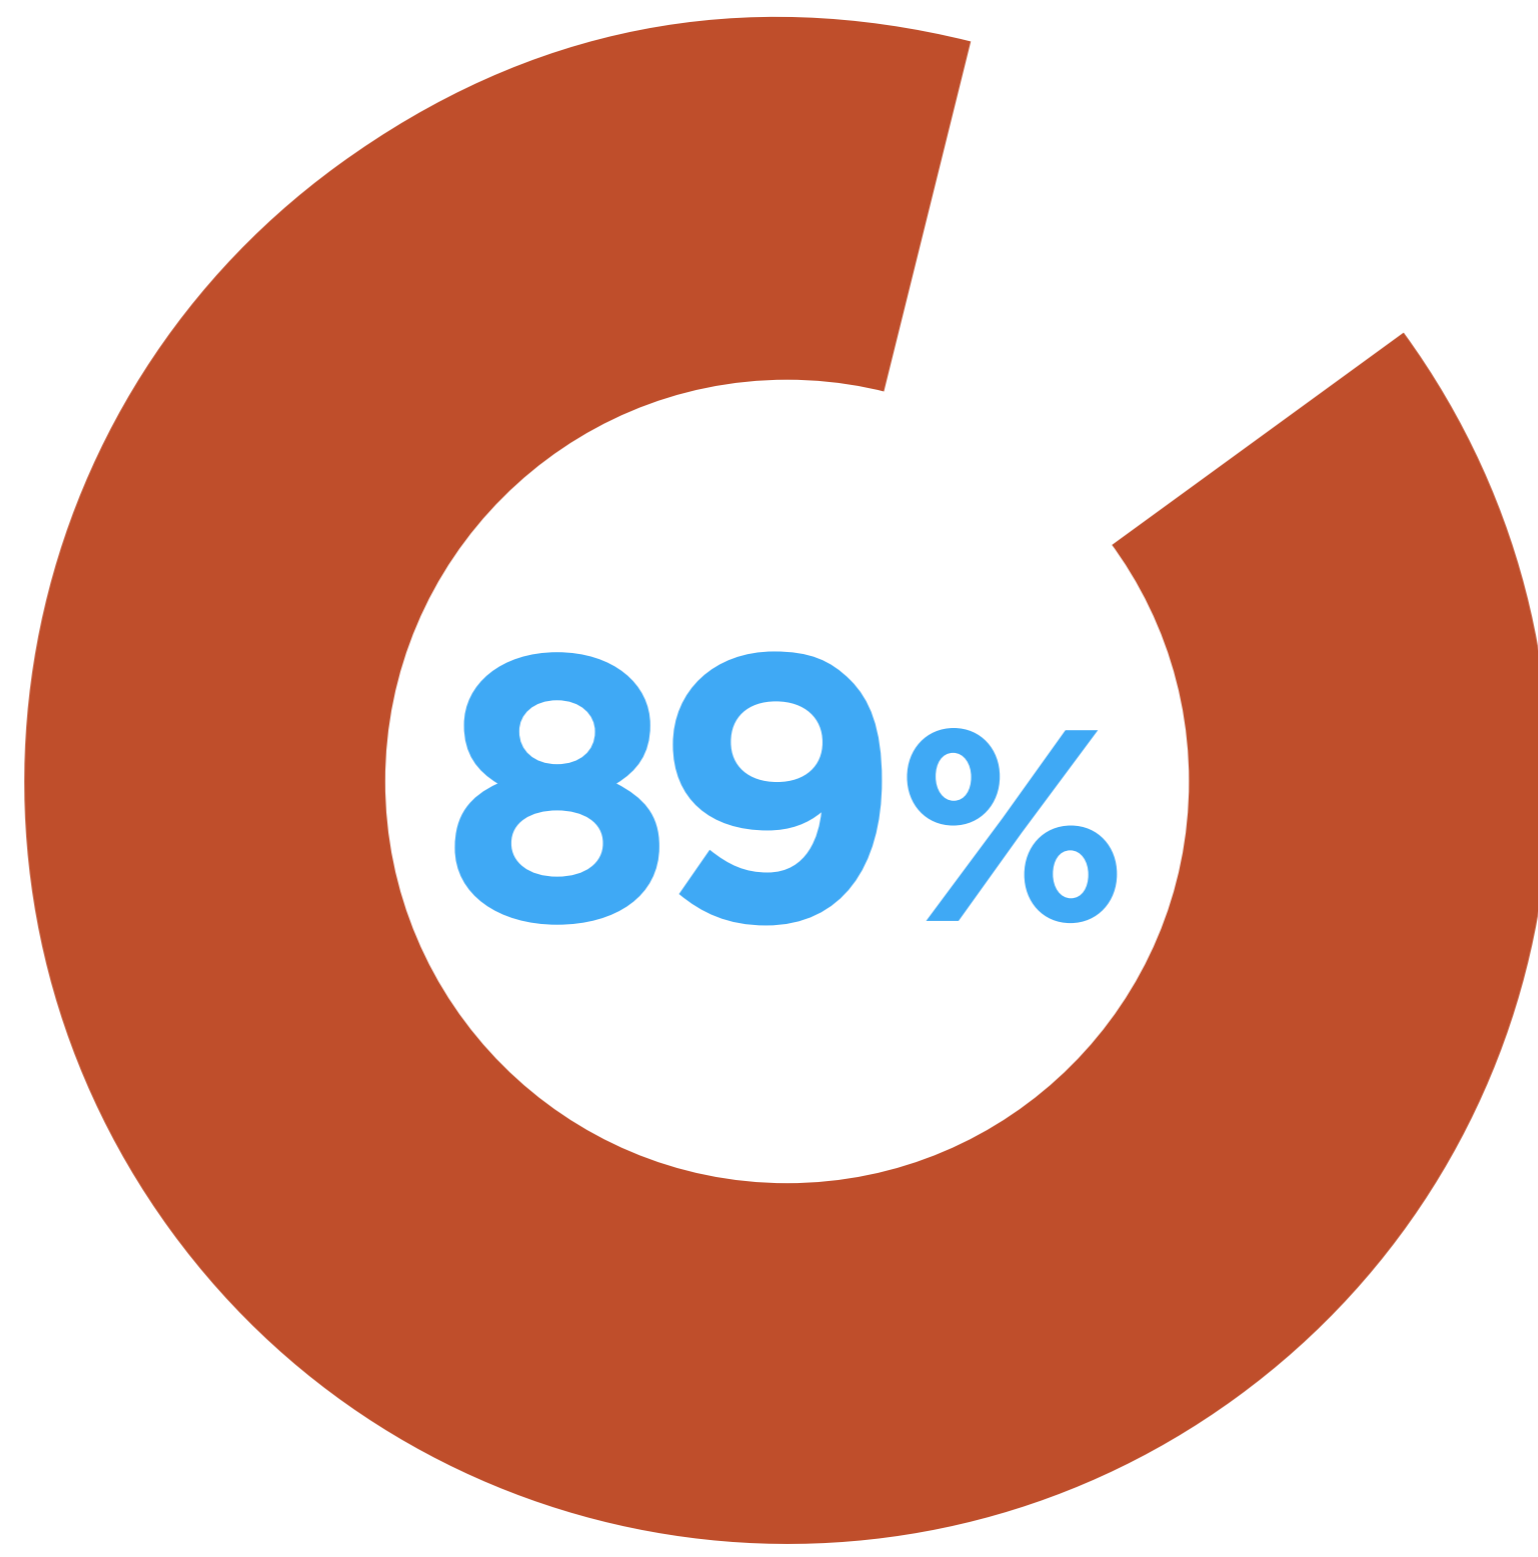

over
60,000
deaths

We ensured an increase in production of SMC medicines

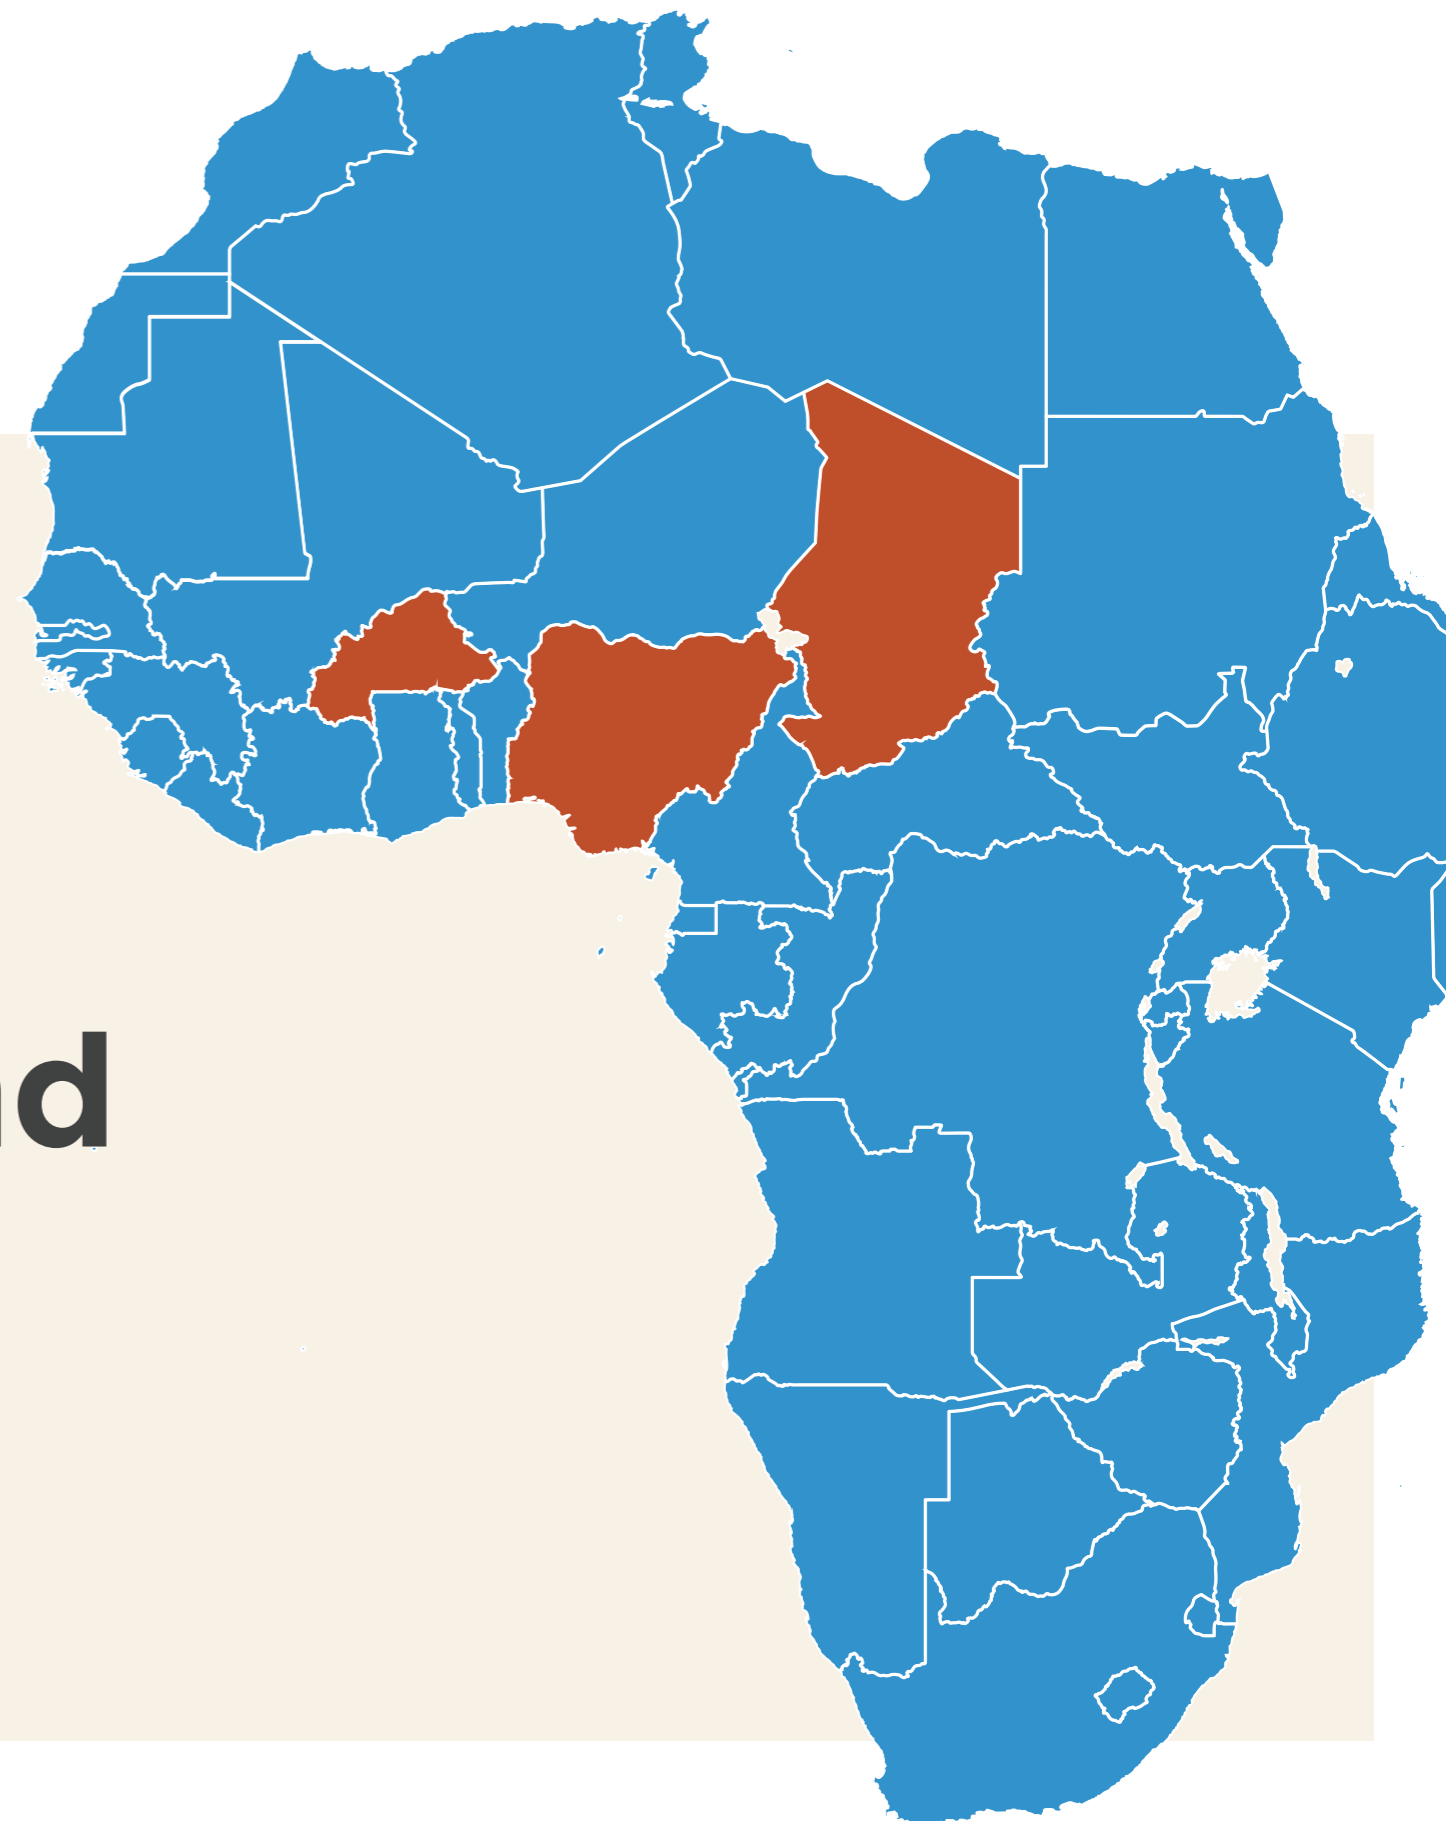

SMC is effective leading to

reduction in malaria incidence

We reach children in **Burkina Faso, Chad and Nigeria** with SMC

In 2018 we expect to reach over

4.3 million
children across the three countries
